* Due to changes in CDC's methodology, these state-specific adult smoking rates cannot be compared to data prior to 2011.

[€] Pregnant smoking rate for most recent year available. In regular type from 2014 birth certificate data. Smoking = smoked at any point during pregnancy. In **bold** type from 2011 Pregnancy Risk Assessment Monitoring System (PRAMS) survey. Smoking=smoked during the last 3 months of pregnancy. Data in *italics* (CT only) the 2002 PRAMS. Smoking = smoked at any point during pregnancy.

** Youth smoking rate from most recent year available; in **bold** type from the Youth Risk Behavioral Surveillance (YRBS); in regular type from Youth Tobacco Surveillance (YTS); and in *italics* from state-specific surveys. OR data are for 11th grade only. WA data are for 10th grade only. Because of different surveys and years, state rankings based on youth smoking cannot be done.

[†] Tax rates shown in **bold** have not been increased for at least 10 years (since 2006 or earlier). "All states" is the state tax average.

[‡] Includes deaths caused by cigarette smoking but not deaths caused by other forms of combustible tobacco or smokeless tobacco products, which are expected to be in the thousands per year. National data includes deaths attributable to exposure to secondhand smoke; state-specific data do not.

[§] NA = not available. State budget for FY2016 was not available at time report went to press.
